It is recommended that you immediately perform a full backup
of this database. If you restore a backup made before the
defragmentation, the database will be rolled back to the state
it was in at the time of that backup.

Compaction is successful. You need to:
copy "c:\ntdscompact\ntds.dit" "C:\Windows\NTDS\ntds.dit"
and delete the old log files:
del C:\Windows\NTDS\*.log
